

# 5 Design & Planning Tips for your Garden Room

Make the most of your new space with these helpful insights from the team at Four Oaks Garden Rooms.

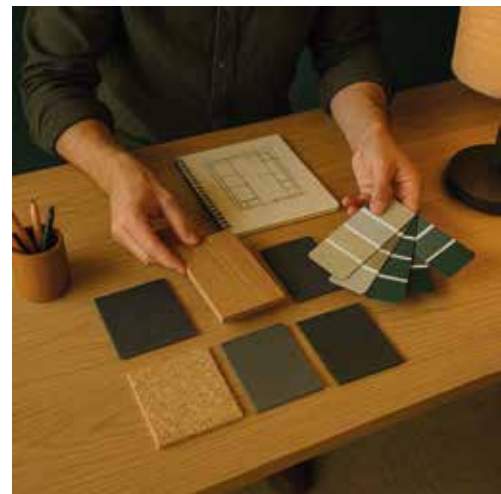

## 1. Think Long Term

Your garden room is a long-term investment. Consider how your needs might evolve over time. Will it stay as a home office, or could it later become a guest room, gym, or creative studio? We can help design a layout that's flexible and future-proof.

## 2. Make It Yours

Tailor your space to reflect your style and lifestyle. Choose finishes, flooring, lighting, and cladding that match your personality, whether you're going for cosy and rustic or clean and contemporary. Every detail can be customised.

## 3. Location Matters

Where you position your garden room affects comfort, privacy, and functionality.

Think about:

- ✓ Natural sunlight (morning vs afternoon light)
- ✓ Garden views from inside the room
- ✓ Privacy from neighbours
- ✓ Access to utility services (water, electricity, etc.) or paths.

*We also offer 3D planning tool to help visualise your space.*

## 4. Get Inspired

Gather ideas, photos, and sketches – they all help bring your vision to life. Visit our showroom to explore material samples, finishes, and example builds in person. We love seeing your mood boards and Pinterest saves! - You can also see our case studies.

## 5. Book Early

Our calendar fills quickly, especially in spring and summer. If you're aiming for a build this year, it's wise to get in touch early – even if you're still at the idea stage. We're happy to help you shape the vision and secure your spot.
